Art Unit: 1652

Claims 2, 6, 7, 12, 15, 20, 23-27, 31, and 33-47 have been canceled. Claims 1, 3-5, 8-11, 13, 14, 16-19, 21, 22, 28-30 and 32 are at issue and are present for examination.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-5, 8-11, and 13, drawn to glucocerebrosidase as produced in mammalian cells, classified in class 435, subclass 200.
- II. Claims 14, 16-19, 21, 22, and 28-30, drawn to mammalian cells transformed with a nucleic acid encoding glucocerebrosidase, classified in class 435, subclass 358.
- III. Claim 32, drawn to a mammal, classified in class 800, subclass 14.

The inventions are distinct, each from the other because of the following reasons:

The transformed cells of Group II and the proteins of Group I are patentably distinct compounds because they are chemically different, the DNA has other utility besides encoding the proteins such as a hybridization probe and the proteins can be made by another method such as isolation from natural sources or chemical synthesis.

Art Unit: 1652

Inventions I or II and III are disclosed as different products which are not connected in design, operation or effect.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
